

Cork Yoga Mat

-- Using the Mat, Close to Nature

The cork mat is 100% natural , recyclable , renewable and biodegradable.No trees are cut down in the process of harvesting cork. And when practicing yoga on it , it' s like close to nature with a fragrance of wood. Due to its honeycomb structure , cork is very durable and provides a high level of friction above and below the mat' s surface . And since there is a waxy substance in the cork tissue, it makes the mat impermeable to liquids and resistant to moisture, for a longer, stronger life.

KEY FEATURES

Non-slip grip

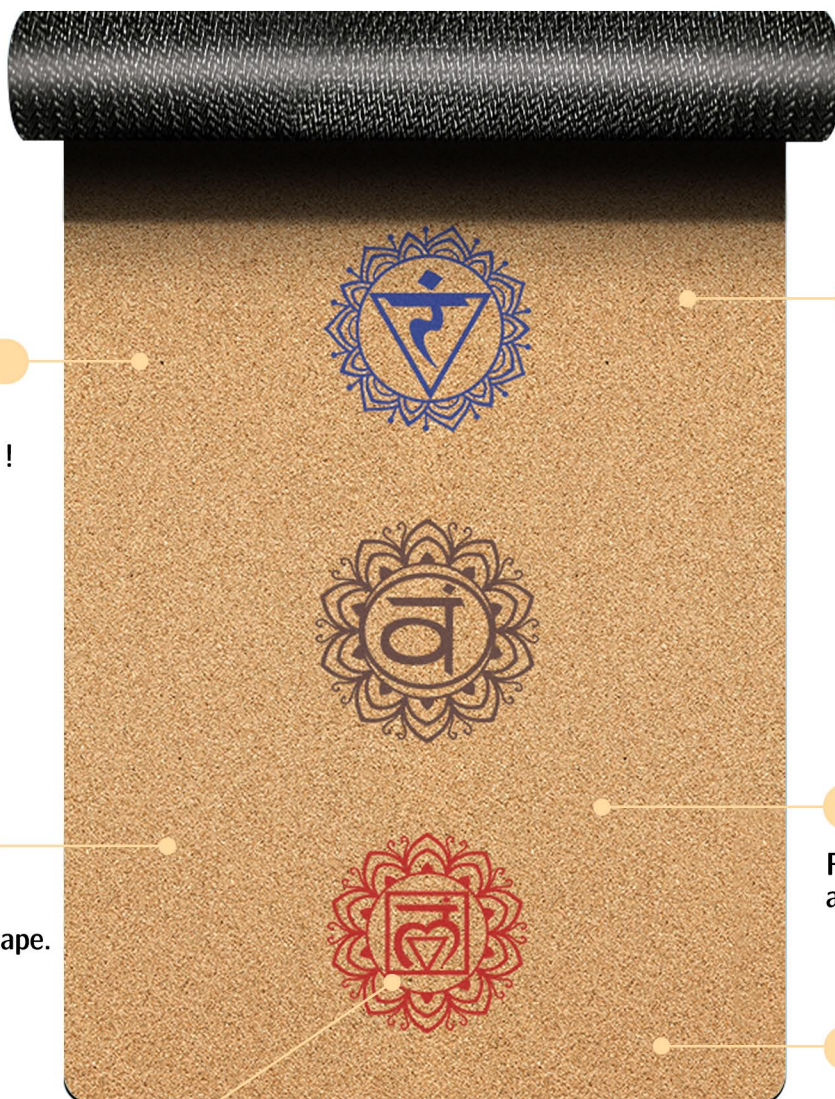

The more water,
the better the mats grip !

Flexible & Resilient

Easy to be compressed
and return to its initial shape.

Customizing logo or patterns

Different size and thickness

72in*24in (L*W) and
thickness from 2mm-5mm
(or custom)

Ultra sustainable
